.

**GUESTS:**

**Joanne Rodrigues, 28 Madera Dr.** and **Brad Heye, 475 Morgan Rd.:** Mr. Heye and Ms. Rodrigues came to discuss the ongoing problem with water accumulating on Ms. Rodrigues driveway at 28 Madera Dr. Brian indicated that he was familiar with the problem from previous discussions with Ms. Rodrigues. The pooling occurs at the end of the driveway, where an old stream bed was located many years ago. Brian suggested that he take another look at the site,

before any recommendations are made. Mr. Heye suggested that one option would be to lower the catch basin at the end of the drive way, Brian also suggested that a culvert might be an option to consider as well. Brian will visit the site in the coming weeks, and report back to the committee on his findings.

#### **OLD BUSINESS and WORK COMPLETED:**

The committee discussed the progress that had been made on the Drainage Committee Manual. Matt indicated that David was reviewing the most recent draft of the Manual, and would be following up with him in the coming weeks. Matt asked the committee members to review the most recent draft and be prepared to discuss any concerns at the November meeting. Brian reminded the committee that the DPW was presently going through an Audit, and as such, there may be some delays in following up some of the old business.

Matt and Tracy briefly discussed the need to review next year's meeting calendar. It was suggested by everyone that 10 meetings a year might be a workable schedule. Matt pointed out that if the agenda does not have many items for discussion, or if no guests are planning to attend, we can certainly forgo that month's meeting. The January and July meetings were tentatively set as months when no meeting will be held.
