- **Portable Assisted Hearing System:** The Director identified the need for an assisted hearing system for use in the Ireland Community Room. The Recreation Director also identified opportunities to utilize an assisted hearing system in other areas of the Community Center. In response, the Town has purchased through ARPA funds, a portable assisted hearing system designed by the Director of MIS. An assisted hearing system overcomes the challenges of noise, distance, clashing conversations, and hearing loss in order to deliver precise and personalized audio in any setting or environment. The Listen Technologies iDSP Prime Level III RF System utilizes a transmitter and universal antenna. It is complete with eight receivers, and universal ear speakers. The system also includes a charging/dispensing station. When a patron with an activated t-coil in their hearing aid, or a patron with earphones, use a neck loop lanyard attached to an iDSP receiver, they are able to hear directly into her hearing aid or ear phone what is spoken into the wireless microphone.
